

TB30M

Tracked Boom

30m working height

14.8m horizontal outreach

Reaching new levels of outstanding capability

The TB30M tracked boom - the ideal solution for sites with challenging ground conditions

Features & Benefits

- Up to 30 metres working height and 14.8 metres outreach
- Market-leading platform size (1.8m x 0.90m) and capacity (400kg) to accommodate up to three operatives
- Can be used with Nationwide Platforms' antenna handling device, SkyTel
- Operator divider cage available for arboricultural applications
- Heavy-duty tracks provide exceptional traction and stability
- Automatic outrigger levelling with the ability to set up on slopes up to 40 percent
- Air, water and 110v supply are all available within the platform basket
- A secondary guarding system to reduce risk of operator entrapment
- Available with a highly trained operator if required
