Suitable, but above all... safe.

We understand that not all work at height jobs are the same, and some have very specific requirements when it comes to working height, outreach, and access. Your equipment must be suitable, but above all, safe.

Our Specialist Vehicles division serve customers who require work at height equipment that offers ultimate precision for the task at hand, whilst also providing the end user with unparalleled flexibility.

With the largest and most diverse fleet of vehicle mounted platforms and tracked booms, we can provide you with the specialist equipment and support you need to ensure your project gets off the ground without a hitch.

With our fleet of specialist vehicles,
nowhere is out of reach.

Truck & Van Mounted Platforms

Getting you where you need to be

When being mobile is a priority, our range of truck and van mounted platforms offer the flexibility you require for your work at height tasks. With the largest fleet of vehicle mounted platforms in the UK, we've got the machines you need to get your job done efficiently and above all, safely.

Range

Our range of van mounted platforms start with working heights of 13 metres to 17 metres whilst our truck mounted platforms go from 14 metres all the way up to 90 metres. With self-drive or operated options, all are available on short and long term hires.

Cost Effective

Multiple jobs? No problem. Vehicle mounted platforms give you the freedom to drive from location to location, allowing you the flexibility to cover multiple sites per day. Working on public highways, or slightly off the beaten track has never been so easy.

Case Study / Self-Drive Truck Mount

Frank Whittle Commemorative Plane

A Versalift T1135EX 4x4 truck mount used by a local charity to inspect a replica Gloster plane.

Fitted with 4x4 off-road tyres, the truck mounted platform had little difficulty gaining access to the replica aircraft mounted at the centre of a roundabout.

Following poor weather and high winds, the 13.3 metre working height and 6.1 metre outreach allowed the engineer to inspect the exterior of the plane closely. Front radial outriggers provided improved levelling and stability on the rough terrain.

Tracked Booms

Compact Access

With working heights ranging from 14 to 31 metres, our tracked booms offer unparalleled access to remote sites where other working at height solutions just won't work. Measuring between 0.74 and 1.58 metres wide and around two metres high, they are able to pass through narrow aisles and standard sized doorways whilst their robust tracks enable them to travel over rough terrain to projects in remote locations with limited access.

Indoor Operations

For applications where the use of a diesel engine is not permitted, we are able to offer models powered by Lithium-Ion technology. Lithium-Ion technology provides quiet and emission free operation, achieving the same speeds and performance as its diesel counterpart.

Versatile Tracks

Robust rubber tracks provide exceptional traction and lateral stability when working on steep slopes or rough terrain - and in some instances they can even climb stairs. As well as distributing the weight of the machine more evenly, they also exert less pressure on the ground, making them ideal for a range of indoor and outdoor applications.

Outriggers

Automatic levelling outriggers ensure the tracked boom is safe to operate in a range of ground conditions. With the ability to overcome height differences of up to 1.2 metres, some models feature variable outrigger settings to allow them to work in enclosed and restricted areas.

Case Study / Tracked Booms

Lighting Maintenance in Commercial Property

A Hinowa TB20HE was used inside a commercial bank to complete essential maintenance to all the light fixtures inside the reception atrium.

The compact TB20HE was selected for its working height of 20.1 metres and outreach of 9.7 metres with flush to the wall trajectory, enabling it to reach through an awkwardly placed support beam above a fixed turnstile.

Powered by Lithium-Ion technology suitable for indoor spaces and weighing just 2880kg the tracked boom found stable footing on the polished marble floors without causing any damage.

BIG Kit

BIG Height. BIG Reach. BIG Capacity.

We can deliver big kit, big knowledge and big safety to provide you with big advantages for your projects. Our BIG Kit range starts from 38 metres to 90 metres with the basket capacities up to 600kg.

BIG Support

All of our BIG Kit is delivered to your project with one of our highly trained, expert operators to give you peace of mind. With a wide range of additional safety attachments and enhanced features, we've specified our BIG Kit to give your project all of the additional support it could require.

BIG Capabilities

Not sure what BIG Kit you need? Our Site Surveys team will access your requirements and the project location to ensure you have the optimal equipment for your tasks.

Tracked booms are the ideal solution where access is restricted, with delicate or soft ground conditions.

Self-Drive or Operated?

Why Self-Drive

With flexible hire solutions, our self-drive options provided on 3.5 tonne vehicles up to 20 metres and 7.5 tonne vehicles up to 26 metres put you in control of your hire, allowing you to spread the cost across multiple sites and projects. Available for collection and drop-off from our dedicated Specialist Vehicles depots across the country.

Why Operated

Our team of highly experienced, professional operators provide a valuable extra pair of hands to take control of your work at height equipment, helping you to get the job done in the safest way possible. Capable of delivering access on the most challenging of projects, our operated hires include same day delivery and removal, minimising on-site presence and keeping disruption to an absolute minimum, giving you the peace of mind that your work at height is in safe hands.

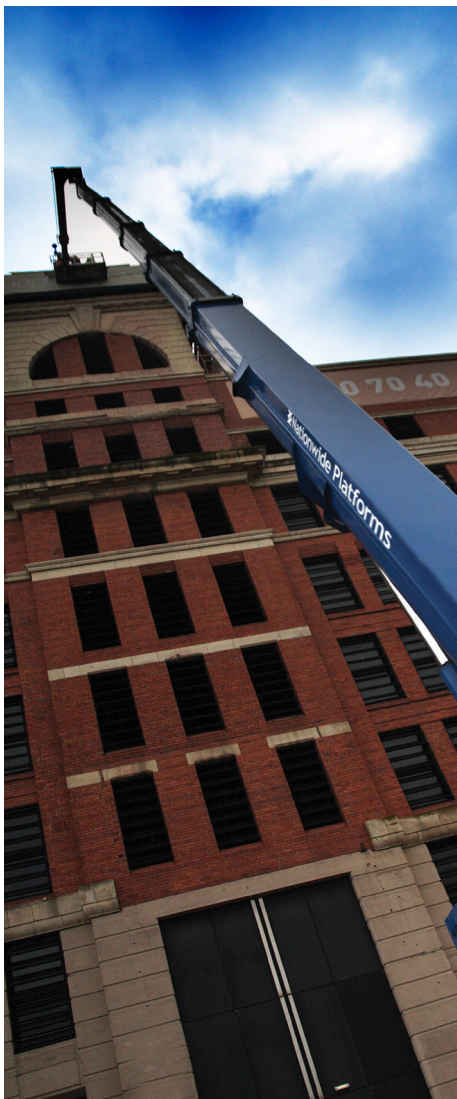

Equipment for All Applications

- ✓ Telecoms
- ✓ Energy
- ✓ Highways
- ✓ Street Lighting
- ✓ Overhead Lines
- ✓ TV, Film & Events
- ✓ Surveying
- ✓ Forestry
- ✓ FM
- ✓ Construction
- ✓ Signage
- ✓ CCTV
- ✓ Bridge Maintenance & Repair

Having an experienced operator from Nationwide Platforms who understands our business is a huge advantage for us.

Application Expertise

Site Surveys

We have a dedicated team of surveyors throughout the UK to analyse and advise on all aspects of your powered access rental. From recommending the right product, organising tailored delivery of the machine through to ensuring you have a machine with the correct working envelope and weight distribution, we ensure that every part of your powered access hire goes as smoothly as possible.

Traffic & Pedestrian Management

We can provide you with a full service Traffic and Pedestrian Management system. Our dedicated account management team can provide local authority and utilities liaison and permissions, as well as the physical traffic management equipment and staff to keep you, your work force and the public safe.

Trackway & Ground Protection

On those difficult to reach jobs, particularly when they're off the beaten track, trackway and ground protection are a necessity. We can recommend and supply specialist trackway systems and advanced ground protection to enable equipment access on soft, delicate, or rough terrain.

Specialist Attachments

To support safe and productive work at height on a diverse selection of sites and projects, we can supply you with a range of advanced specialist attachments. From innovative material handling attachments such as SkyTel for the Telecoms sector, to wendy light and camera attachments for the TV & Film industry your safety is always our priority.

National Coverage, Local Service, Global Reach

Supporting you at every height

With a fleet of over 600 specialist vehicles operating from our strategically located Specialist Access depots we offer a truly nationwide service. Wherever your next project takes you, our equipment, expertise and innovations can support you when working at height.

With the back-up of Nationwide Platforms network of 34 depots across the country, specialist support is never more than a phone call away.

LOXAM

Nationwide Platforms is part of Loxam, the largest equipment rental company in the world. Operating out of 30 countries globally, Loxam has grown from a pioneer to a global leader in 50 years so whether your project is close to home or far away, we have the backing to get you where you need to be.
