

## European market leader in safe working at height

We're proud to offer you the most comprehensive selection of powered access equipment in the UK.

With a fleet of 13,000 including a complete range of scissor lifts, boom lifts, low level access platforms and both van and truck mounted platforms. We also have the largest fleet of specialist equipment, such as tracked access and narrow spider booms, to fulfil all your platform rental requirements.

## Engineering Excellence

We take great pride in our reputation for technical excellence and machine reliability. Our focus on quality helps dramatically reduce the risk of downtime and overruns on location – giving you the confidence and peace of mind both before and after production.

## Training

Our training expertise offers tailored training to suit your exact training needs. As Europe's largest specialist powered access training provider your employees can receive the knowledge they need from one of our award-winning instructors. What's more, we can deliver your training on your site or from one of our national training centres.

## National Coverage, Local Service, Global Reach

### Supporting you at every height

With more than 15,500 machines spanning our depot network, our powered access platforms are utilised daily across the UK. Wherever your next project takes you, our equipment, expertise and innovations can support you when working at height.

Our 38 local depots minimise the need to transport the equipment you need over long distances, giving you access to the right machine at the right time, wherever you're located.

### LOXAM

Nationwide Platforms is part of Loxam, the largest equipment rental company in the world. Operating out of 30 countries globally, Loxam has grown from a pioneer to a global leader in 50 years so whether your project is close to home or far away, we have the backing to get you where you need to be.

YOUR SAFETY  
OUR PRIORITY

**Film & TV Sector  
Expertise in  
Powered Access**

## Proven Sector Expertise

Over recent years, Nationwide Platforms have enabled broadcasters and filmmakers to present the UK's largest live events, media productions and festivals – including the British F1 Grand Prix, Glastonbury, the Royal Weddings and the Grand National.

We understand the importance of meeting time critical production requirements that drive the film, TV, events & festivals industries. That's why we're pleased to offer you the largest and most reliable range of powered access platforms in the UK, along with expertise, advice and assistance from our dedicated sector team.

From equipment scheduling, to machine operation and safety training, we offer a complete solution for your working at height needs. In addition, our continuous commitment to safety ensures you will be able to meet your workplace safety obligations without interruption.

## Specialist Solutions

### Lighting & Filming

We offer a wide variety of machines with a proven track-record in the film, TV, live events and festivals industries – many designed for mounting lighting equipment and cameras. Our larger truck mounted platforms are available for hire with wendy lighting frames, Gainsborough brackets, camera pods and high capacity extendable 600kg cages in addition to a range of unique accessories designed to make broadcasting and filming straight-forward and hassle free. What's more, some of our fleet also have memory functions taking the hassle out of set-up by returning the attached cameras or lighting equipment back to their initial position.

With working heights from 22 meters up to 90 meters, our larger units can also be supplied with 360° rotating camera cages which provide continuous rotation around a centrally mounted camera pole with an integrated seat; or make use of the various additional camera attachment points on this spectacular piece of kit.

Over the last 2 years Nationwide Platforms has invested significantly to replace our machines with Hybrid & Electric equipment where possible. Over 60% of our 13,000 strong fleet are non-diesel (Electric, Hybrid or LPG) which are ideal for use on indoor enclosed sets due to their low emissions.

So you can rest assured whatever the task - we have the perfect solution for you.

### Stage / Set Building

Suitable for all stage building and installation projects, our equipment offers the perfect solution for all your requirements. We've worked on some of the largest live Events & Festivals across the UK including Glastonbury, Reading Festival, Isle of Wight Festival, and BBC Proms in the Park. With route access often a barrier for most work-at-height solutions on remote film and festival sites, our extensive range of platforms can overcome those difficulties with our fleet of 4x4 and tracked options. With safe working loads up to 600kg, our solutions and specialist attachments can help carry the weight of your materials used to construct those spectacular sets and stages we're all used to seeing.

### An approved supplier to leading broadcasters

Nationwide Platforms have been supplying powered access equipment to the broadcasting & events sectors for decades, so it's reassuring to know that we are approved suppliers to the BBC, Sky, ITV and Channel 4. We're also the first powered access supplier recommended by Albert; a BAFTA governed consortium taking action on environmental sustainability in the UK production and broadcasting industry.

“ The 24/7 support on the four seasons of Peaky Blinders ensures the production team can meet its deadlines. They understand the TV and film production industry inside out. ”

The detailed survey by the dedicated account manager; the supply of specialist equipment and attachments; along with the supply of fully trained IPAF operators, means we have the right equipment that is operated correctly, and safely, at all times.
