

SkyScreen™

Innovation in Safety

SkyScreen™ from Nationwide Platforms is an innovation in safety which minimises the risk of injury and damage by preventing dropped objects falling from the platform basket.

Features

- Lightweight mesh weighing only 2.5kg.
- Full height coverage from top hand rail down to the top of the kick strip.
- Tool-less installation, secured around handrails using Velcro anchor points with magnets to secure to the kick strip.
- Constructed from a combination of fire retardant PVC outer and a woven mesh inner lining.
- Polycarbonate rods used to provide rigidity to the net along the access gate area.

Benefits

- Retains maximum visibility through the mesh whilst still providing dropped object protection.
- Provides containment for dropped objects, tools and materials down to 15mm in size.
- Quickly fitted/removed on-site as required for each task.
- Compatible with other innovations including SkyRak® Boom and SkySiren® PCS™.
- Three panel design comprising of a left hand, a right hand and a gate section to provide total cover around the basket.

Compliance

- The mesh has been tested in line with LPS 1215 – Requirements for the LPCB Approval and Listing of Scaffold Cladding Material.
- All materials are fire retardant.

Total cage protection

Reduced risk of dropped objects when working at height

Wind rated to:

6ft Basket 2 persons = 6m/s

6ft Basket 1 person = 12.5m/s

8ft basket = 6m/s
