

SkyShield™

Helping to provide COVID-19 protection

SkyShield™ is a robust, lightweight screen providing a safer working environment.

Features:

- UV stable shatterproof polycarbonate
- Aluminium Frame
- 12-15kg weight
- No reduction in wind speed required
- Tool-less installation
- Approx 2m height above basket floor and full basket width

Benefits:

- Protects your workforce
- Maximum visibility
- Lightweight and robust
- Compliant with wind speed rating
- Simple to install
- Maximised protection

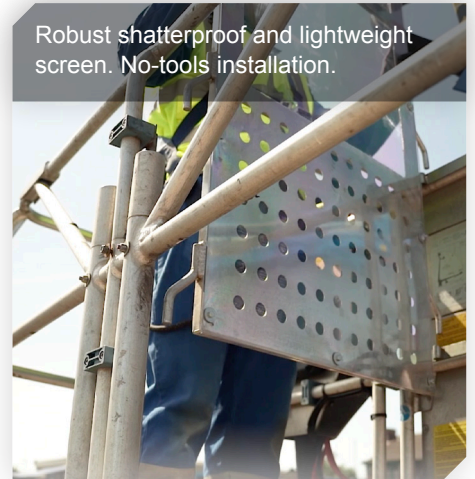

Compliance with guidance

In line with the government's response to the COVID-19 pandemic Nationwide Platforms has developed the SkyShield™ protection screen. Designed to support your COVID Secure procedures this unit helps create a safer working environment for all personnel using powered access equipment, including the MEWP operator.

Where work tasks require multiple occupants, specifying the large platform deck can help maintain the recommended two metre social distancing requirements.

To help reduce the risk of virus contamination SkyShield™ should always be used in conjunction with the latest government guidelines on COVID-19 secure procedures and regulations.

Robust shatterproof and lightweight screen. No-tools installation.

MEWP compatibility

SkyShield™ is compatible with the following range of truck mounted platforms:

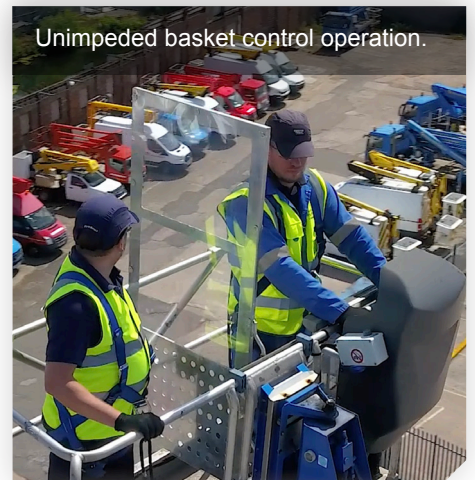

GSR 22m

Ruthmann 28m (4x4) & 33m

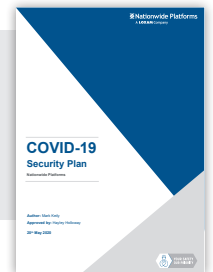

Bronto 38m, 44m, 50m, 56m, 70m, 90m – all with extending basket to 3.7m

SkyShield™ is compatible with the unique SkyTel™ antenna handling device when fitted to the following range of Bronto truck mounted platforms T38B, T50JB, T56B-XR, T70B, T90B.

Unimpeded basket control operation.
